WHICH NOW OFFERS EVEN GREATER POSSIBILITIES FOR CUSTOMIZING.
A VAST MODULARITY THAT MEETS EVERY FURNISHING REQUIREMENT AND IS COMPLETED
BY A WIDE RANGE OF FINISHES TO GIVE A UNIQUE IDENTITY TO THE BATHROOM ENVIRONMENT.

LA TRASVERSALITÀ DELLE DECLINAZIONI DI AIRY

AIRY SISTEMA VETRO

Personalizza le tue composizioni con frontali cassetto e ante in vetro Stop-sol.
Customize your compositions with Stop-sol glass drawer fronts and doors.

AIRY SISTEMA

L'ampiezza del consolidato sistema Airy è l'anello di congiunzione tra le novità 2023.
The breadth of the well-established Airy system is the link in the 2023 novelties.

AIRY EDGE

La declinazione Edge porta una nuova prospettiva nel mondo Airy caratterizzata da un design raffinato ed elegante.
The Edge declination brings a new perspective to the Airy world characterised by a refined and elegant design.

Airy Sistema Vetro

L'aspetto caratterizzante di Airy Sistema Vetro è dato dalla presenza di frontali cassetto e ante composte, al posto del classico pannello in legno, da un vetro di tipologia Stop-Sol sostenuto da un telaio in alluminio verniciato nero. Questa nuova declinazione di Airy prevede la possibilità di avere due tipologie di aperture: una maniglia nera integrata nel telaio oppure il meccanismo push&pull.

Airy Sistema Vetro

The distinguishing feature of Airy Sistema Vetro is the presence of fronts and doors composed, instead of the classic wooden panel, of a Stop-sol-type glass supported by a black painted aluminum frame.

This new declination of Airy provides the possibility of having two types of handles: a black profile integrated in the frame or the push&pull mechanism.

Luce a led interna

È possibile personalizzare pensili e cassetti scegliendo di integrare una luce a led che viene incassata nel fianco (nel caso di pensili e colonne) oppure nella parte superiore della sponda del cassetto. L'accensione è regolata da un sensore di apertura.

Internal led light

It is possible to customize wall units and drawers by choosing to integrate an led light that is recessed in the side (in the case of wall units and columns) or in the upper part of the drawer side. The lighting is regulated by an opening sensor.
